

DHARMANA LOKESH

Data Analyst | SQL, Python & Power BI

Srikakulam, Andhra Pradesh | 9542959711 | lokeshdarma@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

2026 B.Tech graduate with hands-on Data Analyst experience through two internships and four end-to-end projects spanning SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis, and DAX-driven KPI design, with a track record of building interactive dashboards from raw datasets exceeding 9,000+ records. Combines strong database fundamentals (MySQL, relational schema design) with cloud exposure (AWS) to deliver accurate, decision-ready insights.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), OOP, File & Exception Handling

Databases & SQL: SQL, MySQL, Relational Database Design, JOINS, GROUP BY, HAVING, CASE WHEN, Aggregate Functions (COUNT, SUM, AVG), Subqueries, DISTINCT, Primary/Foreign Keys

Visualization & BI: Power BI, DAX (CALCULATE, COUNTROWS, AVERAGE, DISTINCTCOUNT), Power Query, Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Conditional Formatting), Dashboard Development, KPI Design

Data Analysis: Exploratory Data Analysis (Univariate, Bivariate & Multivariate), Data Cleaning, Data Validation, Data Transformation, Data Interpretation, Trend Analysis

Cloud & Tools: AWS (10+ services incl. EC2, Lambda, LightSail, S3, IAM), Git, GitHub, Jupyter Notebook, VS Code

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern — Skill Dzure

Nov 2025 – Apr 2026

- Collected, cleaned, and validated real-world datasets using Python (Pandas, NumPy), improving data accuracy and consistency for downstream analysis.
- Performed exploratory data analysis to identify trends and patterns, translating findings into insights that supported project decision-making.
- Strengthened data analysis and problem-solving skills through hands-on, deadline-driven data projects.

Gen AI & AWS Intern — Techwing

Aug 2024 – Jul 2025

- Analyzed and visualized 30+ datasets (1,000+ records each) using Pandas, NumPy, Seaborn, and Matplotlib to support AI-enabled, cloud-based solutions.
- Worked with 10+ AWS services (including EC2, Lambda, LightSail, S3, etc.) on data processing workflows, gaining hands-on exposure to cloud-based analytics.
- Collaborated with cross-functional teams to interpret business requirements and deliver accurate analytical outputs.

PROJECTS

Amazon Prime Video Content Analysis Dashboard / Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI

- Performed end-to-end Exploratory Data Analysis (EDA) on a 9,668-title Amazon Prime Video dataset using Python and Pandas, including data cleaning, preprocessing, validation, and analysis.
- Analyzed 7,814 movies and 1,854 TV shows using Matplotlib and Seaborn to identify trends and patterns across genres, ratings, release years, content types, and country-wise content distribution.
- Designed an interactive dashboard (donut, line, bar charts, slicers) comparing 7,814 movies vs. 1,854 TV shows, identifying Drama, Comedy, Action, and Suspense as leading genres and the U.S. as the top content-producing country.

Indian Banking Transactions Analysis / Excel, Pivot Tables, Dashboard

- Analyzed 500+ banking transactions in Excel to uncover trends across regions, payment modes, and fraud patterns.
- Cleaned and structured data using Excel Tables, formulas, and a custom year-month field for time-based analysis.
- Built 13 PivotTables to break down transaction volume, amount, payment mode, region, and fraud trends.
- Designed an interactive Excel dashboard with KPI cards, bar/line/doughnut/stacked-bar charts, and slicers for dynamic filtering.

Hotel Reservation Operations Analytics / MySQL, SQL

- Designed and implemented a relational MySQL database (6 interconnected tables, 6+ primary/foreign key relationships) to manage 7,000+ hotel reservation records; imported and validated 7,045+ records with data type conversion, date handling, and integrity checks.
- Wrote and executed 30+ SQL queries (JOINS, GROUP BY, aggregate functions, CASE, HAVING, date functions) to analyze booking demand, guest behavior, and room utilization.
- Analyzed 2,800 bookings and 3,200 stay records to uncover patterns in cancellations, no-shows, and service requests, supporting operational decision-making.

EDUCATION

B.Tech in Electronics and Communication Engineering

Sep 2022 – Apr 2026

Godavari Institute of Engineering and Technology | CGPA: 8.06

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Python for Data Science — IBM
- Python Programming — Innomatics Research Labs
- Artificial Intelligence — Skill Dzure
